SUMMARY

- Proven specialist in **developing and optimizing ETL processes**, **data pipelines for large-scale datasets using Python and SQL in Element**, to enhance data accuracy and speed, resulting in significant cost savings and performance improvement.
- Extensive experience in **data migration to Google BigQuery and dashboard migration to Google Looker** from **multiple different sources**, while ensuring **improved scalability, performance, and operational efficiency**
- Proficient in analyzing diverse ecommerce data such as **sales, deliveries, shipments, traffic, catalog assortment, Walmart Fulfillment services (WFS) and Walmart connect Adspends**.
- Expert in **strategic planning and execution, with a track record of driving annual, quarterly, and monthly category planning** in alignment with corporate goals, financial targets, and seller engagement initiatives. Skilled in **identifying and capitalizing on high-growth product categories** and sellers using data insights.
- Proven expertise in creating automated data pipelines, generating actionable insights, incorporating real-time predictive machine learning models, and spotting opportunities for business growth.

WORK EXPERIENCE

Walmart Inc Bentonville, Arkansas

***Senior Manager Data Analytics* (Global Marketplace)** July 2025 – Present

- **Leading a team of 8** and the data engineering and data analytics effort, guiding changes and ensuring new data blends with the Unified dataset.
- Analyzing ecommerce Marketplace data like **Sales, Deliveries, Shipments, Traffic, Catalog (Assortment), Walmart Connect, Seller Onboarding** and preparing automated **Weekly, Quarterly and Yearly Business** Reviews to help leadership making better decision.
- Working with stakeholders across Walmart marketplaces and standardizing the ecommerce metrics also guiding Business team across markets to use self-serve looker BI
- Developing and **optimizing efficient ETL** processes and **data pipelines** for tables over 7 billion rows using Element tool and integrating **Python, SQL, and BigQuery**, automating data collection, transformation, and loading to enhance accuracy and speed, and analyzed SQL queries to **reduce query slot usage by 70%,** yielding significant cost savings and improved performance.
- Enhancing productivity and accelerating decision-making processes within the business team by **automating various Excel and Sharepoint workflows using Element (Walmart Internal Tech).**
- Proficient in designing and implementing **interactive dashboards in Google Looker using LookML**, **Power BI,** etc enhancing data-driven decision-making and stakeholder accessibility.
- Work closely with **stakeholders** to **comprehend their business objectives and transform** them into data needs
- Proficient in **performance analysis and enhancement**, with the ability to **work directly with Account Managers** to analyze performance at **both seller and SKU levels**. Demonstrated success in tracking and improving key factors such as **on-time delivery, pricing competitiveness, and seller fulfillment rates**.

***Manager Business Analysis and Insights* (Walmart International)** Sep 2023 – June 2025

- Led the migration of data from **Qlik Sense, DataIKU, Hive, Oracle, Orbit to Google BigQuery and Looker**, optimizing data pipelines for improved scalability, performance, and operational efficiency.
- Leveraging advanced analytics **on logistics, and website traffic data to drive cost efficiency**, improve delivery times, and enhance online customer engagement.
- Building and automating **end-to-end data pipelines** to extract, transform, and deliver reports via email, streamlining reporting processes and **improving data accuracy**.
- Developed a **Python script to automate catalog translations** to languages **like Spanish and French using BigQuery**, ensuring consistency and efficiency in the **translation process** that was later leveraged by the Walmart Translation team to build item translation portal
- Generated actionable data insights and developed customized dashboards in **Tableau, Power BI and Looker to effectively communicate KPIs and trends**, supporting the **growth of GMV for Walmart ecommerce** and identifying key business performance improvement opportunities.

National Fertilizers Limited Vijaypur, India

Senior Data Engineer Aug 2016 – Aug 2022

- Employed **SQL** advanced functions, including **window functions**, aggregate functions, primary and foreign key, and **complex joins** and **Python** to build data pipelines and extract insightful information from the Chemical Plant data uncovering valuable findings
- Collaborated with diverse teams to analyze data via **SQL** and **MS Excel**, developed a software in **Visual Basic Applications (VBA) and Advanced Microsoft Excel** to generate **automated reports** for stakeholders

EDUCATION

University of Cincinnati, Carl H. Lindner College of Business, Cincinnati Aug 2022 – Aug 2023

Master of Science in Business Analytics: GPA 3.9/4.0
